### **3SI Security Systems and Scorpion Security Products Announce Distribution Agreement**

*Exclusive agreement covers security software protecting consumer electronics in retail locations*

**Malvern, PA, May 30, 2019:** 3SI Security Systems announced today that it has signed an exclusive global distributorship agreement with Scorpion Security Products for the SWIS® software security solution.

3SI has long-term relationships with retailers in the consumer electronics market thanks to the strong success of their Phone Tracker™ and Cash Tracker™ GPS tracking solutions. Offering the SWIS solution provides retailers with an additional layer of security that is especially effective against the growing threat of ORC.

SWIS is an application tool installed to protect display phones at retailers. The tool provides a unique method of protection using various sensing technologies. The solution is flexible and can be deployed on most display items or certain highly-targeted models. This tool, coupled with Scorpion protective display devices and 3SI tracking support services, is the most effective display security offered in the market today.

“This agreement provides 3SI with another great security solution to offer electronics and big box retailers. Crime in these establishments is growing and offering another layer of security to protect inventory will be very beneficial. Retailers are looking for effective measures to fight back” said Todd Leggett, CEO of 3SI.

“The team at Scorpion is thrilled about the partnership with 3SI” said Pete Gulick, Founder and CEO of Scorpion. “The synergies between our companies were evident from day one. 3SI is the world leader in asset protection technology and the addition of our SWIS solution adds a critical element in the fight against theft. That coupled with 3SI’s deep law enforcement relationships means customers will gain a real advantage in the fight against crime, especially ORC.”

The agreement between 3SI and Scorpion is effective immediately and product integration is targeted for market release within 90 days.

### **About 3SI**

Founded in 1970, 3SI is the market leader in pioneering advanced security solutions for asset protection and recovery. We are always ahead of the curve starting with the commercialization of dye and ink staining, to our ongoing development in GPS tracking and beyond. Our technology protects more than 250,000 locations worldwide, and we actively combat crime through innovative solutions. 3SI's **mission** is to protect society through dependable security strategies backed by superior solutions, services and technologies. Our **vision** is to create a safer world.

### **About Scorpion**

Scorpion Security Products, Inc., is a leader in the retail security industry, specializing in display security for handheld electronic devices. The company was established in 2008. Scorpion's mission is to provide the highest level of consumer engagement while maintaining maximum security.
