

PRODUCT END OF LIFE NOTICE

3XG Financial Cash Tracker™ – United States Region Only

EFFECTIVE October 19, 2018

Major US cellular carriers plan to retire their 3G networks in the United States as of December 31, 2021.

LTE is now the preferred network for Internet of Things (IoT) applications such as telematics, asset tracking, security, and video.

3SI has been working with the US carriers since 2017 to develop our next generation tracking solution (4XG) which will communicate on LTE networks.

Today, 3SI Security Systems will release the 4XG Financial Cash Tracker. With today's notice, new purchases of our Cash Tracker in the United States will be fulfilled with the 4XG Cash Tracker in the financial markets. 3SI will support 3XG Cash Trackers already installed until the 3G network is retired in the United States as of December 31, 2021.

3SI believes it's important to be transparent about the transition plan for moving from the current 3XG version to the new 4XG version before the 3G network retires at the end of 2021. We're working proactively with all our clients and partners to assist in their migration to the more advanced network and product platform.

Clients outside of the United States will continue to be supported by the 3XG platform and can continue ordering current 3XG part numbers until further notice. As more products are scheduled for launch, we will continue to communicate specific details in advance to all impacted customers.
