FOR IMMEDIATE RELEASE

New 4XG Cash Tracker™ Utilizes Latest Tracking Technology to Protect Cash in financial organizations

With Cash Tracker, financial organizations can protect cash anywhere it is vulnerable

Malvern, PA, October 19, 2018: Every day, there are news stories of robberies at banks and credit unions because cash drawers are a quick and easy target for criminals. Traditional measures such as CCTV or alarms can be easily foiled by criminals. Cash Tracker utilizes proven GNSS/GPS tracking technology to provide extremely reliable and detailed tracking information. Cash Tracker solves crimes by recovering stolen money and capturing criminals using 3SI's tracking system.

3SI's 4XG devices expand on our highly successful NextGen3 platform. Over 120,000 NextGen3 trackers are deployed worldwide to protect customers in Financial and Retail locations. The new 4XG devices include all the features of NextGen3, incorporate 4G/LTE technology and use GNSS (Global Navigation Satellite Systems) as well as WiFi for superior location accuracy.

Cash Tracker offers the following key benefits to users:

- **Triggers automatically** when removed from cash drawer
- Blends with other cash - uses real cash for **authentic appearance**
- As thin as a **No. 2 pencil**
- **Flexible** and bends in half nearly impossible for robbers to detect
- Upon activation, **device automatically alerts** designated security contact and police
- Tracking location is updated every 6 seconds to provide **super-detailed track data**
- **GNSS/GPS, Cellular and WiFi tracking** options provide precise location reporting
- **Reliable performance** is ensured by bi-monthly Device health check with cellular connection

3SI is the only tracking company partnered with over 7,000 law enforcement agencies...the key benefit of this partnership is that our devices report the crime directly to dispatchers who communicate location data to responding officers. Criminals are tracked and typically apprehended in less than 20

minutes. The quick response and apprehension minimizes danger to innocent bystanders and increases the likelihood of preserving evidence.
