

July 26, 2019

Dear 3SI:

We have been a customer of 3SI Security Systems since 2017. We are a private equity backed business, founded in 1984, with over 1,500 stores and agents throughout 26 states. As a Money Service Business, security is very important to us, our staff and our customers.

We approached 3SI for a solution and to protect cash in a few locations experiencing higher rates of crime. Within the first few months of deploying, we solved 3-4 thefts and were really pleased with the performance of the 3SI equipment.

Because of the successes we had, we made the decision to expand and protect more of our locations with Cash Tracker™. We now have over 250 trackers deployed and continue to experience successes. Here are a couple notable recoveries / apprehensions:

- In May 2017, three burglars broke into our branch in Rampart, TX. They caused over \$7K in damages and only got away with two rolls of quarters and a 3SI tracking device! Luckily police were able to catch all three of them. Even though they didn't steal much money, it was important to us that police caught them, and they will be unable to commit more burglaries.
- In January 2019, two suspects entered our location in Spring Cypress, TX, and demanded cash from a staff member...they unknowingly also took a Cash Tracker. The suspects fled and police successfully tracked them to a residential neighborhood. They were arrested within minutes of the robbery and we recovered over \$35,000 in stolen cash.

We have been very pleased with the performance of our 3SI trackers as well as the support we receive from customer service and our Account Executive, Brian Rafferty. We open new branches all the time and will continue to protect them with 3SI GPS Tracking.

Thanks for everything 3SI!

Kind regards,

Alberto Laureano
