To Whom It May Concern:

At Simmons Bank when it comes to physical security nothing is more important to us than our customers and employee's safety. When unfortunate circumstances arise and a robbery occurs, we encourage our associates to comply with the robbers demands and, if safe to do so, follow through with our established procedures as quickly as possible. An integral part of our robbery procedures includes handing out a 3SI Cash Tracker™ unit.

3SI Security Systems tracker units and the unparalleled service they provide allow Simmons Bank to provide quality asset protection with state-of-the-art technology that works. When a tracker is activated, law enforcement receives immediate notifications that they use to track criminals and make apprehensions. Our physical security team is included on all notifications; we're able to check on the branch employees and provide any assistance needed immediately.

We're also very appreciative of the outstanding service provided by Walter Davis, our Account Executive, and all the 3SI team. All are very responsive, have assisted with many of our security projects and do an excellent job. The relationship we've developed and the level of service we've come to expect make working with 3SI a very valuable partnership!

Sincerely,

A handwritten signature in black ink that reads "Daryl Ross".

Daryl Ross

Director of Physical Security
